Profile

Director of Longevity Scientific Research / University of the Ryukyus

Professor of Doctor of Medicine – University of the Ryukyus

It is said that vegetables grown in Okinawa are “different.”

Recently, attention has focused on the exceptional potency of Okinawa native grass in neutralizing free radicals.* UKON grows well in tropical and subtropical zones, but recent research indicates the superior efficacy of the elements found in UKON grown in Okinawa over UKON grown in Southeast Asia. In Yanbaru, the northern region of Okinawa’s main island, the deep forests are consistently free of environmental pollution, and the longevity of its people is well known. The superior quality of UKON grown in Yanbaru over other Okinawan UKON may be attributed to the rich soil in which it grows.

UKON has garnered attention since as far back as the Ryukyu Kingdom period. Recent findings substantiate autumn UKON’s reputation for possessing high levels of curcumin, a substance which helps support and maintain healthy liver function.* In addition, the spring UKON’s essential oil component featured by recent studies is also attracting a great deal of attention.

It is well known that UKON has positive effects on many of the internal organs because it plays an important role in controlling healthy physiological functions at a basic level. Thus, it is becoming more and more important for healthy people in modern times to take UKON for the maintenance and enhancement of their health.

The synergistic effect resulting from combining KANGEN UKON with antioxidative KANGEN WATER® makes it a revolutionary supplement.

The UKON ingredient in Okinawa KANGEN UKON Σ is grown in the fields of Yanbaru, well known for its mineral-rich soil.

The UKON is washed and sterilized in Strong Kangen and Acidic Water and is then converted into a powder.

KANGEN UKON Σ Power

KANGEN WATER® soft gel ca

UKON (Turmeric)

UKON (commonly known as "Turmeric") is a plant which has been known since the era of the Ryukyu Kingdom and has a strong antioxidant effect. Pesticide-free and no-preservative UKON cultivated by contracting farmers is used in the product. The autumn UKON has a high content of curcumin and the spring UKON has abundant mineral and essential oil components. They are washed with Strong Kangen Water® sterilized with Strong Acidic Water, and then blended together.

Olive Oil

Olive oil is composed primarily of oleic acid, a fatty acid that can help maintain LDL (low density lipoprotein) levels that are already within normal limits.

Perilla Oil

Perilla Oil is composed of 50-60 percent α-linolenic acid, an omega 3 fatty acid that can help in maintaining a strong immune system.*

Vitamin C

One of the leading vitamins which promotes antioxidative actions.*

Vitamin B₂

One of the vitamins critical to metabolic processes; also known for the maintenance of good health.*

Vitamin B₁

This vitamin helps break down carbohydrates into fuel for the body and is effective in maintaining nerve functions.*

Vitamin B₁₂

Together with folic acid, plays a key role in regulating red blood cell formation.*

Vitamin E

A fat-soluble antioxidant that stops the production of reactive oxygen species formed when fat undergoes oxidation.*

Abnormal fermentation in the colon **Bacteria, Viruses** **Cigarettes** **Radio Waves**

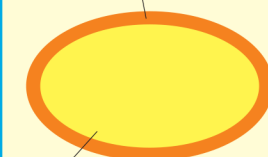

Leading factors producing free radicals

Ultra-violet rays **Stress** **Alcohol** **Exhaust fumes**

The world's first KANGEN WATER® soft gel

Soft gel (used to prevent exposure to oxygen and moisture)

Innovative packaging technology is incorporated to repel moisture and prevent oxidization. Each KANGEN WATER® soft gel capsule is individually packaged for easy use.

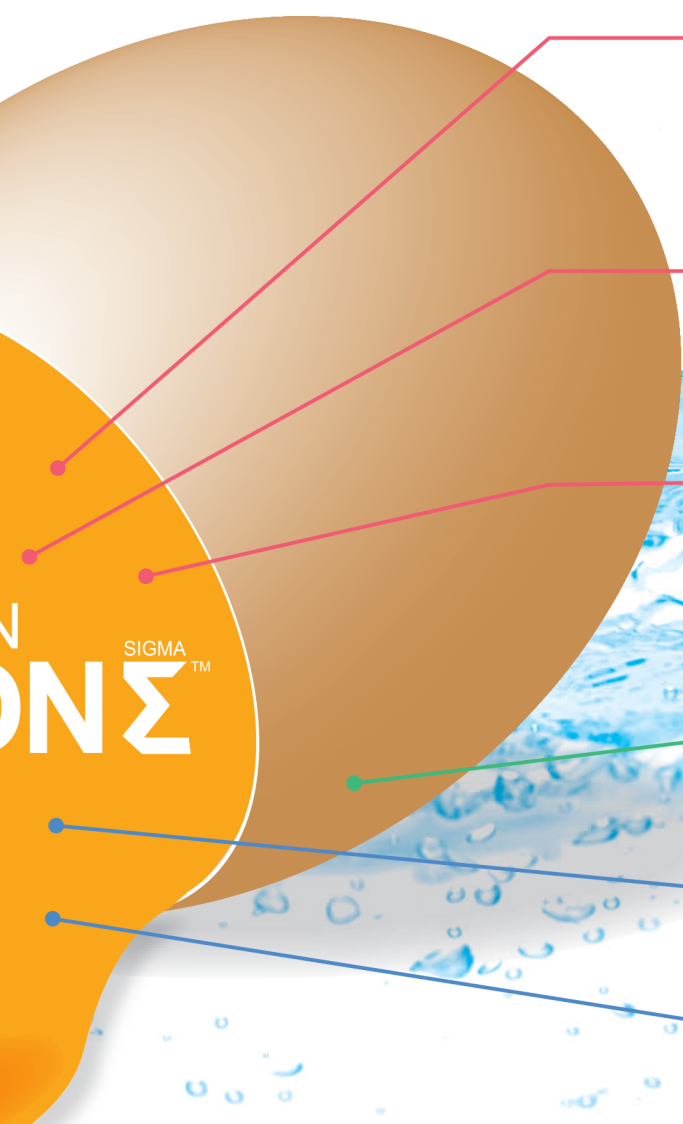

Content (in liquid form for easy absorption)

Patent Number: 4469660

Capsules contain a myriad of fresh nutrients.

Flaxseed Oil

Flaxseed Oil is primarily composed of a-linolenic acid, an omega-3 fatty acid commonly found in fish oil. It promotes healthy cardiovascular function and helps maintain cholesterol levels that are already within normal limits.*

Evening Primrose Oil

An unsaturated fatty acid which contains more than 9% gamma-linolenic acid. Studies indicate that it helps maintain cholesterol and blood sugar levels that are already within normal limits.*

Tocotrienol

Tocotrienol is contained in rice and is a member of the vitamin E family. It is also called "super vitamin E" due to its antioxidation effect.*

Beeswax • Glycerin Glycerin fatty acid ester

Niacin

Niacin is an essential nutrient which helps maintain healthy skin and promotes healthy liver function.*

Folic Acid

An essential nutrient which supports numerous bodily functions including the production of healthy red blood cells.*
